EDUCATION

B.Tech — Computer Science & Engineering | Parul University, Vadodara 2024 – 2028 CGPA: 7.42 / 10

Class X (GSEB – NCERT) | G.N.F.C. Narmada Vidyalaya, Bharuch Percentage: 80.33% 2022

Class XII (GSEB – NCERT) | G.N.F.C. Narmada Vidyalaya, Bharuch Percentage: 66% 2024

TECHNICAL SKILLS

Languages : HTML, CSS, JavaScript, Python, Java, C/C++
Frontend : HTML5, CSS3, JavaScript, React.js
Frontend & Design : React.js, Tailwind CSS, Responsive Web Design, UI/UX Principles
Backend & Database : Node.js, Express.js, REST APIs, MongoDB, MySQL/PostgreSQL, Firebase **Cloud**
& Tools : Git, GitHub, VS Code, REST APT, Render, AWS(Beginner)

PROJECTS

Daily Drape — Clothing E-Commerce Website 2026

- Built a responsive e-commerce platform for clothing with product listings, search & filter, and cart functionality.
 - Implemented JWT-based user authentication and order management with a clean, mobile-first UI.
 - Designed reusable React components and integrated a backend REST API for real-time product data.
- Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS | [View on GitHub](#)

NewsCore — AI-Powered Aggregator & Summarization Platform 2026

- Built a progressive web application (PWA) news aggregator featuring automated content ingestion from toggleable RSS feeds and real-time frontend caching.
- Leveraged the Gemini API to perform single-call execution for automated text summarization, multi-class categorization, and core sentiment tagging (Positive/Neutral/Negative).
- Engineered high-performance UI mechanics including infinite scroll, skeleton loading states, image lazyloading, and a dynamic "Top Story" hero layout.
- Implemented client-side engagement layers including a localStorage-backed bookmarking system for guest users, Web Speech API speech synthesis ("Listen" functionality), and automated browser push notifications for followed categories.
- Developed a dedicated administrator panel incorporating an analytical charts dashboard to track API consumption/system errors alongside manual editorial bypass switches.

Stack: React.js, Node.js, Express.js, Gemini API, MongoDB, Tailwind CSS | [View on GitHub](#)

FUTURE PROJECTS

Swachh Spot — Public Sanitation Discovery Platform

2026

- Built a full-stack web platform to help every citizen discover, rate, and verify nearby public sanitation facilities in real time.
- Implemented granular filters for accessibility needs including wheelchair access, water availability, lighting, MHM-friendly, and gender-neutral restrooms.
- Integrated crowdsourced audit system where users earn credits for uploading verified photos and confirming live facility status.
- Designed an SOS Panic Button feature for women in secluded areas, alerting emergency contacts with geotagged location.
- Built admin dashboard for municipalities to track grievances, assign cleanup tickets, and monitor contractor SLA compliance.

Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS | [View on GitHub](#)

CERTIFICATIONS & COURSES

→ **AWS Community Day** = Amazon Web Services 2026 → **Introduction to Microsoft Azure & Cloud Computing** = Parul University — Value Added Course 2025

→ **Web Development using React.js** = Parul University — Value Added Course

2025

ACHIEVEMENTS & EXTRA-CURRICULARS

- Participated in Tech Expo — showcased **Swachh Spot**, a civic-tech sanitation platform built to address public hygiene challenges across India.
- Attended AWS Community Day — engaged with cloud practitioners and gained exposure to real-world AWS architecture and DevOps practices.
- Built two production-ready web projects (**Swachh Spot** & **Daily Drape**) solving real-world problems using the MERN stack.
